OBJECTIVE

Final-year BSc Information Technology student with a strong foundation in software development, databases, and data analytics. Experienced in Python, SQL, Java, C#, and C++, with practical exposure to data preprocessing, statistical analysis, and machine learning fundamentals. After beginning my professional career in healthcare as a dietician, I developed a strong interest in data and technology, which motivated my transition into Information Technology. Skilled at analyzing datasets, identifying patterns, and developing data-driven insights. Seeking to apply technical and analytical skills in a Data Analytics or IT-focused graduate programme.

EDUCATION

BSc Information Technology 2024 – Present
North-West University, South Africa
Academic Average: **74.8%**

Relevant Coursework: Data Analysis, Artificial Intelligence, Data Structures & Algorithms, Databases, Object-Oriented Programming, System Analysis & Design, Computer Networks, Information Security, Decision Support Systems

BSc Dietetics 2010 – 2015
University of Limpopo, South Africa

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, C#, C++

Data Analysis: Data preprocessing, cleaning, EDA, statistical analysis, visualization, reporting

Libraries & Frameworks: Pandas, Matplotlib, ASP.NET Core, Entity Framework Core

Databases: SQL Server, MySQL, Oracle

Tools: Microsoft Excel (Advanced), Git, Google Colab, Visual Studio 2022, VS Code

Concepts: Machine Learning fundamentals, data modelling, business analysis, algorithms, system design

SOFT SKILLS

- Analytical Thinking
- Problem Solving
- Communication
- Team Collaboration
- Client Engagement
- Attention to Detail
- Learning Agility

PROJECTS

Municipal Complaint Management System **Grade: 94%**
System Analysis and Design (CMPG 223) — Group Project

Designed and developed a relational database system to manage municipal service requests and complaints efficiently.

- Designed a relational database system to manage municipal service requests and complaints

- Implemented CRUD functionality for managing users, services, and complaint records
- Analyzed complaint datasets to identify service delivery trends and recurring issues
- Generated data reports and summaries to support operational decision-making
- Implemented role-based authentication and system access controls
- Collaborated with team members using Git version control

CMA Fitness Management System

Grade: 88%

System Analysis and Design (CMPG 311) — Group Project

A database system created for CMA Fitness gym to manage members, trainers, class bookings, payments, and equipment efficiently.

- Member Management: Register members, track membership status, and store member information
- Class Booking System: Allow members to book fitness classes and prevent double bookings
- Trainer Management: Manage trainer schedules, sessions, and availability
- Payment Tracking: Record membership payments and track outstanding balances
- Attendance Tracking & Equipment Management: Monitor attendance and track gym equipment
- Reporting: Generate basic operational and financial reports

PROFESSIONAL EXPERIENCE

Community Service Dietician

2015 – 2016

Healthcare Professional

- Analyzed patient health and nutrition data to develop evidence-based nutrition plans
- Maintained structured data records and reports for monitoring treatment outcomes
- Interpreted medical and nutritional data to identify patterns and health trends
- Communicated complex health information clearly to patients and healthcare professionals
- Applied analytical thinking and problem-solving to evaluate treatment effectiveness

ACHIEVEMENTS

- Academic average of 74.8% in BSc Information Technology
- Achieved 94% for Municipal Complaint Management System project
- Achieved 88% for CMA Fitness Management System project
- Successfully transitioning from Healthcare into Information Technology
